1. INTRODUCTION

Background:

Our project aims to bridge the gap between job seekers and employers by creating a modern job portal. This platform will facilitate smooth interactions, providing tools for job seekers to track applications and employers to manage postings effectively.

Problem Statement:

The hiring process is often inefficient, with job seekers struggling to find relevant opportunities and employers facing challenges in managing applications. A centralized, user-friendly solution is needed to streamline these processes.

Stakeholders G Interests

- **Job Seekers**: Access to personalized job recommendations and application tracking.
- **Employers**: Tools for posting jobs, filtering candidates, and tracking application progress.

Objectives:

- Build a responsive job portal with real-time features.
- Implement secure user authentication and role management.
- Enhance recruitment processes with intuitive design and efficient tools.

Scope:

This project will deliver a web-based platform that addresses core functionalities like job search, posting, and application management. Advanced analytics and reporting features are outside the current scope.

2. LITERATURE REVIEW

Related Work:

Existing platforms like LinkedIn and Indeed provide job search services. However, they lack real-time interactivity and customized filtering features.

Gap Analysis:

Our project addresses gaps in real-time user interaction, customizable filters, and ease of use, which are not fully addressed by competitors.

3. FYDP OVERVIEW

FYDP Title: Full Stack Job Portal

Sr. No	Roll Numbers	Name	Signatures
1.	**063768**	**M Saram Sarfraz Sharwani**	
2.	**063797**	**Syed Rabees Ali Shah**	
3.	**063758**	**Babar Hassan**	

Table 1 Project Proposal Summary

FYDP Goals:
Develop a high-performance job portal that ensures seamless job application processes for seekers and efficient management tools for employers.
FYDP Objectives:
● Create a dynamic and user-friendly interface.
● Enable real-time data updates and efficient job search.
● Provide secure and scalable user authentication.
FYDP Success Criteria:
A fully functional web application meeting the stated objectives, deployed and tested successfully.
Assumptions:
All users will have internet access and basic knowledge of using online job portals.
Risks & Obstacles:
● Integration challenges with third-party tools.
● Potential delays due to team availability or technical issues.
Organization Address: Government M.A.O. Graduate College, Lahore
Target End Users: Job seekers and employers.

4. TOOLS, LIBRARIES AND TECHNOLOGIES WITH REASONING

Table 2 Tools Technologies and Libraries

Tools/Libraries/ Technologies	Version	Rationale
React JS	**Latest**	**Dynamic and responsive frontend.**
Tailwind CSS	**Latest**	**For sleek, responsive UI design.**
Supabase	**Latest**	**Real-time backend and data management.**
Clerk Authentication	**Latest**	**Secure user authentication and management.**
Shadcn UI	**Latest**	**Modular and consistent UI components.**
Figma	**-**	**For design mockups and prototyping.**
MS Word	**-**	**For documentation and report creation.**

5. WORK DIVISION

Table 3 Project Team Members Work Division

Sr. No	Roll Number	Name	Role Assignment & Work Division
1.	**063768**	**M Saram Sarfraz Sharwani**	**Backend Development, Project Management, Documentation**
2.	**063797**	**Syed Rabees Ali Shah**	**Frontend Development, Authentication Implementation, Documentation**
3.	**063758**	**Babar Hassan**	**UI/UX Design, Database Management, Documentation**
